ENTREPRISE DU
PATRIMOINE VIVANT

100% MADE
IN FRANCE

Chapuis Armes, a Living Heritage company renowned for its exceptional craftsmanship and its hunting or shooting guns made in France in the purest gunsmithing tradition is now an integral part of the Beretta Group. Recognized as the largest private company in the global arms and ammunition market, the Beretta Group is present in more than 110 countries with a large number of production sites and distribution subsidiaries. Thanks to the power of the Group's distribution network, Chapuis Armes can now enter international development.

Within a few years, the amount of our exports increased twofold. This brand-new catalogue offers a detailed overview of our latest production,

combining tradition and innovation, so as to meet the expectations of our customers who are among the most demanding enthusiasts. Each one of our guns or rifles is subject to strict quality controls to ensure customer satisfaction. Our highly skilled craftsmen work every day with passion to produce hunting or shooting guns and rifles, combining aesthetics, customization and performance. We invite you without further delay to examine our catalog to discover, or rediscover, each one of our models, whether our iconic double express rifles or our Super Orion shotguns, as well as the brand-new ROLS.2 rifles which are now among the best straight-pull action rifles on the market.

STRAIGHT PULL ACTION RIFLE

Born more than seven years ago, the ROLS rifle is now in progress with this second generation. It is the result of a reflection based on the feedback of our many customers and users. The objective of this evolution was to keep the best of the ROLS while making subtle changes enhancing this rifle with its already unique feature. Discover without further delay the new technical and aesthetic changes which characterize this ROLS, second of its name.

Technical updates

Ergonomic improvements

1/ New direct-striker system.

The new striker-trigger assembly works by utilizing gravity, thereby maximizing the action's efficiency and giving exceptional trigger response.

2/ New cocking/decocking control.

Incorporating advanced ergonomics to fit the last phalanx of the thumb, this upgraded control is easier to manipulate - especially upon pushing forward (i.e., manual cocking). This is now achieved fluidly and without effort, albeit still deliberately.

3/ New microcell recoil-soaking buttpad.

Length of pull is adjustable by means of 5mm (.2") spacers. Also, buttpad is adjustable vertically to better accommodate the user's body and shooting style.

4/ Cocking lever.

To facilitate opening and handling the action, we have modified the inner workings of the cocking lever. This, paired with the new gravity-driven trigger-release mechanism, makes opening and closing the action exceptionally smooth and eliminates any points of felt resistance.

5/ New adjustable ST trigger.

Depending on your hunting style and situation, you can use a control located above the trigger to switch between a 1.2 kg (2.6 lbs) trigger pull - ideal for driven game - and a 600 gram (1.2 lbs) trigger pull - ideal for longer-range precision shooting. A safety device is always locking the control.

6/ New magazine polymers Manufactured using 3-D printing.

ROLS magazines feature an improved blend of hi-tech polymers that further facilitate charging and feeding. 4-round capacity for standard calibers and 3-round capacity for magnums.

New receiver design

Featuring crisper lines and an anti-glare treatment, the newly-designed receiver gives the rifle an updated look.

New stock design

A tapered, more slender forend features a rounded tip, thereby facilitating gripping with the supporting hand, as well as yielding an even more elegant look. This new forend shape makes the ROLS even more suited to more intuitive shots (e.g., for driven game) as well as deliberate aiming-offhand or using a rest. You will achieve your ideal shot no matter the hunting conditions.

Rols.2 Heritage

Characterized by more than 8 major evolutions compared to the first version, this brand-new generation of ROLS rifle displays 2 completely new features. The complete reengineering of the percussion mechanism made it possible to

create a trigger with an almost unmatched crisp release as well as a brand-new adjustment system that we have called ST Trigger (Switch Trigger) which allows you to select the release pressure in a very intuitive way until the moment of firing.

Rols Classic Bronze or Black

Features: New one-piece stock in 2 Star Walnut with a refined design, sanded and oil finished. Combined with a new height-adjustable Micro Cell recoil absorber which that allows the rifle to be fit to the morphology of each owner, the stock length is now adjustable thanks to 5 mm thick spacers. New Fortal 7075 alloy receiver, black anodized, integrated into the stock. Bolt lever ball finely engraved in black anodized alloy. Quick detachable swivels with their studs on the stock. Presented in a Chapuis Armes thermoformed gun case.

Rols range

STRAIGHT PULL ACTION RIFLE

Rols.2 Deluxe

The new firing pin/trigger assembly which works with a gravity hook eliminates any travel between the trigger and the firing pin and features an exceptionally crisp trigger release. Associated with a brand new reverser positioned on the top of the trigger, you can, depending on the evolution of your

shooting conditions, switch in a fraction of a second from an SR (Short Range) position, ideal for driven hunts, with a release pressure set in our workshops at around 1.2 kg (2,4 lbs) to an LR (Long Range) position, perfect in approach shooting conditions, set at about 600 grs(1,2 lbs).

Rols.2 Deluxe

Features: New receiver in Fortal 7075 Alloy anodized gray tone with a new engraving with double English scroll and hunting scenes with a wild boar on one side and a stag and a doe on the other. 4-Star Luxe Walnut stock and refined front. Sanded wood, oil finished. Tool cap with universal key placed inside the pistol grip. Anodized bolt lever ball finely engraved, grey tone. Quick detachable swivels with their studs on the stock. Presented in a Chapuis Armes thermoformed gun case.

This new multi-purpose tool has been conceived to give you full autonomy for assembling and disassembling your ROLS rifle. Our engineers were able to house it into the pistol grip, integrated to an elegant take-down pistol grip cap . The barrel as well as the bolt can be changed with it. This cap and its integrated tool have been patented.

Rols range

STRAIGHT PULL ACTION RIFLE

Rols.2 Carbon +

Developed in cooperation with FBT, an Austrian carbon stock specialist, this new version displays all the features of the new ROLS.2 . Designed to meet the expectations of those who are looking for a very light rifle. Thanks to its thumb-hole

stock, this model offers an excellent grip which ensures great stability for long-distance shots. hunts. Switch barrels allow the hunter to face any hunting situation in any of the five continents, year round.

Rols.2 Carbon +

Features: New Black Anodized Fortal 7075 Alloy receiver with new engravings on the 2 sides and on the underside which match the one on the slide. Assembled with a brand-new carbon thumbhole stock made by FBT, this new stock has a height-adjustable cheekpiece. The streamlined fore-end allows a good grip. It is equipped with an assembly designed to match with a Spartam magnetic bipod. Fluted and threaded barrel in M 14x1 without front sights. Fitted with a muzzle brake. Aluminum bolt receiver ball engraved and black anodized. Quick detachable swivels with their studs on the stock and fore-end. Presented in a Chapuis Armes thermoformed gun case. Weight: 2.7 kg. (6 lbs).

STRAIGHT PULL ACTION RIFLE

Scabbards and accessories

A range of traditional scabbards of very fine workmanship, developed by our teams, now completes the Chapuis Armes offer. Meant to protect your gun or your rifle during transports or hunts, they are available in 2 versions. Full

opening: thanks to a full-length zip, these scabbards can be carried either by hand with their leather handles or over the shoulder with their length-adjustable strap.

Rifle scabbard with scope. Length 130 cm (52 inches)

Features: Sand-colored canvas with leather lining all along the zipper. Double zipper with sliders. Synthetic fleece lining. Large external pocket for ammunition and accessories 30 cm x 20 cm (12 x 8 inches) Double leather handle and adjustable strap for transport with leather reinforcement at the barrel muzzle. Chapuis Armes leather logo.

Hunting rifle scabbard.
Length 130 cm. (52 inches)

Features: Sand-colored canvas with leather lining all along the single-way zip. Synthetic lining. Leather handle and adjustable strap for transport with leather reinforcement at the barrel muzzle. Chapuis Armes leather logo.

Ergonomic shoulder strap

Features: New generation of ergonomic shoulder strap made of leather and lined with neoprene for greater comfort. Allows you to adjust instantly the length of your shoulder strap. Its ideally positioned Fitgo device allows to safely adjust the tension you need between you and your rifle with one hand only by reducing or lengthening your shoulder strap.

Classic Collection

WITH ROUND ACTION

Chapuis Armes offers many options for every gun, such as a single:

- non-selective trigger unit

On all Express rifles, the customer may opt for:

- Pivot scope mounts and rings
- German claw-type scope mounts for rail-fitted scopes
- Additional smoothbore barrel kits in either 20 ga. or 28 ga., barrel length and chokes per customer request.

Over & under Express rifle with adjustable convergence of the barrels

Over & under Express rifle with a free floating barrel design and a mechanical system to adjust the convergence of the barrels. The Soul of these new express rifles obviously resides in the hidden barrel regulating system. Whether you fire four, six or eight rounds cartridges in a quick succession or

just send one or two bullets on their way to your game, convergence and regulation stay assured in most hunting situations and with most quality cartridges. With this new over & under double rifle the regulation adjustment block is not visible.

C5 - C10 Light

C5 Light Extractor C10 Light Ejector

Available Calibers: 8 x 57JRS -
9,3 x 74R - 30.06

Average weight: 2,9 kg

Round-shaped receiver in Fortal Alloy 7075 with round cutouts on the receiver walls and ribs underlining the barrels. English-style floral scroll engraving with hunting scene with deer on one side and boar on the other. Nickel finish in old silver grey tone. 550 mm (22 inches) barrels with S12 type mechanical adjustment. Available Calibers: 9,3 x 74R - 8 x 57JRS - 7 x 65R - optional calibres 30R Blaser - 300Win Mag 375H&H - 30.06

Average weight: 3,2 kg

New round body action based on our 20 Gauge frame. New deep-cut engraving wrapped around the receiver with a sophisticated decor in English scroll and bouquets plus new game scenes on action sides and bottom. Double trigger "Blitz" type battery. 55cm (22in) Barrels pre-machined for scope sight mounts. Luminescent rib rear sight and adjustable foresight. AAA fancy walnut rounded stock with English style cheek piece and similar forend on Ejector guns (2 stars walnut on the Extractor version). Comes in an CHAPUIS ARMES ABS molded case equipped with coded locks.

C15 Serie 3

C15 Serie 3 - Ejector

New scalloped 28 ga. round action

Available Calibers: 9,3 x 74R - 8 x 57JRS - 30.30 Win

Average weight: 2,9 kg

New action, originally developed for 28 ga., with reduced height and width for faster handling. Rounded out design, with a smaller detonating and reduced firing pins spacing. New "Royal" style deep-cut engraving wrapping around the receiver, with new game scenes engraved on both sides and bottom of the action. New barrels profiles, 55 cm (22-in.) length. AAAA Fancy walnut rounded stock with english-style cheekpiece, smaller forend. Comes in an CHAPUIS ARMES ABS molded case equipped with coded locks.

C25 Serie 3

C25 Serie 3 - Ejector

New scalloped 28 ga. round action, fitted with sideplates

Available Calibers: 9,3 x 74R - 8 x 57JRS - 30.30 Win

Average weight: 2,9 kg

Same features as the Model C 15 Série 3. Plus: Boxlock with sideplates. New engravings Holland & Holland « Royal » style, with hunting scenes on the sides and underside of the action. 4 stars grade walnut stock with pistol grip and English cheekpiece. Steel pistol grip cap hand-engraved. Checkered walnut butt plate. « Blitz » type lockwork with two triggers, short trigger guard. Gun case « Chapuis Armes » made in ABS synthetic material, with code operated locks.

Side by side Express rifle with adjustable convergence of the barrels

In a conventional double rifle, barrel convergence can only be obtained by a complex soldering operation that requires highly skilled labour and mandates the use of only one load. With

very few exceptions, this means that going to another load requires re-regulation of the barrels, which implies returning the gun to the factory for intricate polishing and blueing.

Classic Collection WITH ROUND ACTION

X4

X4 - Extractors or Ejectors

Available Calibers: 8 x 57JRS -
9,3 x 74R - 30.06 - 30R Blaser -
308 Win

Average weight: 3,1 kg

Scalloped receiver with mustaches reinforcements. New deep engraving with large scrolls for the ornamentals and wild boar or roebuck trophy engraved underneath the receiver. Pistol grip stock with English style cheekpiece in AA Fancy walnut. Hand-rubbed oil finish hand cut checkering.

Mechanical adjustment device.

Free floating right barrel.

Progress side-by-side Express rifles

We managed to keep the weight of these sleek double rifles under 3 kg and retained their exceptional accuracy, sensational balance and fast-handling

particulars. These are designed for quick response when driven big game is the order of the day.

Classic Collection
WITH ROUND ACTION

RGEX Serie 3

Rgex Serie 3 - Ejector

New scalloped 28 ga. round action

Available Calibers: 9,3 x 74R -

AAAA grade walnut pistol grip stock with English-style round cheekpiece and engraved steel grip cap. Matching walnut buttplate and forend with a fully inlaid smaller lever lock. Hand-rubbed oil finish, hand cut checkering. Double-trigger "Blitz"-type battery, short trigger guard. Comes in an ABS molded case equipped with coded locks.

Super Orion Over & under light weight shotgun

The technical design of our Super Orion receiver which is one of the lowest in the market has an interchangeable recoil plate located just underneath the barrel that confer to our Shotgun an exceptional strength. As our over & under is one of strongest shotgun we present today the C30-C35 Light, a lightweight version of our iconic Super Orion.

The choice of rough material is always a critical step in the manufacturing process of hunting weapons, we conducted extensive research with our metallurgist's partners to offer what's now the best in terms of Ultralight alloy.

Classic Collection WITH ROUND ACTION

C60 Light Woodcock
with extractors

C60 Light Woodcock.

.410 Gauge Over & under Super Orion

The expertise and excellence of Master Gun Makers has allowed us to engineer a totally new receiver exclusively meant for the .410 caliber cartridge. Very much sought after by hunters praising difficult

shots, this superb small "Super Orion" with its exclusive design, unique technical features, will please the most demanding among you.

CHAPUIS ARMES
FRANCE

C.410 ga **C35**
with ejectors

New receiver "Super Orion" with particular space between the firing pins, specially designed for the .410 cartridge. Made of machined 42CD4 steel with a new design, Boss style, and polished receiver walls. New engravings, with broad scrolls on the sides and a soaring woodcock engraved in a medallion on the underside of the receiver. Barrel length: 710 mm (28 inches) with ventilated top rib. Pistol grip and tulip-shaped fore-end tip, grade 3 walnut. Fixed chokes only.

Average weight 2.6Kg (6 Lbs)

Classic Collection

WITH ROUND ACTION

28 Gauge Super Orion shotguns and Progress side by side

The renewed interest of dedicated hunters and shotgunners in the 28 ga. quickly translated in many guns being launched on the market. Many of these are not true 28 ga. designs and are heavier than needed to fire this small but very efficient cartridge. At Chapuis Armes, we worked up from the cartridge dimensions and paid special attention to conserving the balance, light weight and liveliness

of our Super Orion smoothbores, painstakingly shaping the entirely new round body action and the detonating. The best shotgunners around the world have already told us that the exquisite lines of this new shotgun, along with its tried and proven mechanical reliability, place it very high indeed in this emerging category.

Classic Collection
WITH ROUND ACTION

28 ga. C35 Round Design

28 ga. C35 RD - Ejector

New round body action, scalloped for perfect fit

Barrel length: 710 mm (28 in.) barrels - 760 mm (option)

Fixed chokes standard, interchangeable choke tubes

Interchangeable chokes Optional. Straight grip stock with AAA fancy walnut. Hand rubbed oil finish with hand checkering. Comes in a fitted molded plastic case with combination locks.

Artisan Collection

WITH ROUND ACTION

The assembling of a shotgun and a rifle require expertise. If the fitting and adjusting process is almost the same on a shotgun versus an express rifle, the technics varies. The craftsmanship ended up with unique firearms made under customers requests fitted for every single client.

Super Orion over & under shotgun

Whether you are looking for a finely balanced upland gun or a lightning-fast woodcock shotgun, the new Super Orion Round Design is worth a second look. You may now select a traditional scalloped receiver or an elegant sideplate gun. Both have been painstakingly detailed by hand by our Master Gunsmiths, from the round body to the new detonating. Both come with hand-cut

engraving signed by one of our Master Engravers, in a tapestry wraparound fashion. Bottomless blueing on the barrels enhances the quality of the luxury, hand-picked walnut. These are beautiful, very robust indeed shotguns, in a timeless french style. Fast handling, self pointing for impressive game bags, they run the gamut, from driven pheasant missiles to fast raising upland birds - in complete elegance.

Artisan Collection

WITH ROUND ACTION

C135 Artisan - Ejector

Upland or Woodcock type

New action, round body receiver, scalloped for better wood-to-metal fit

Gauges: 12 / 16 / 20 / 28

Barrel length: 600 mm (24 in.) - 660 mm (26 in.) - 700 mm (27 1/2 in.) - 760 mm (option)

Fixed chokes (interchangeable choke tubes optional)

Weight: 2,6 kg to 2,9 kg depending on gauge and barrel length

C135 Artisan Ejector

Hand-contoured round action scalloped for a better wood-to-metal fit and new, hand-sculpted detonating. Hand engraved by one of our Master Engravers; signed, deep-cut foliage accents with fine game scenes, wraparound engraving on both action sides and action bottom. Double trigger "Blitz"-type battery. Fixed chokes (interchangeable choke tubes optional)
Weight: 2,7 to 2,9 kg depending on gauge and barrel length

Artisan Collection
WITH ROUND ACTION

Progress Serie 3 Express Rifle

Now available with the new Progress Serie 3 action, the Artisan version of these side-by-side rifles present incredibly fast handling, making them ideal for driven game hunts. The round-body receivers enhance the sumptuous walnuts we select for their high contrast and delicate figure. We travel to remote areas in the Caucase where we select standing trees that we insist are prepared, dug

out, not felled. Blanks are then cut and transported to our plant where they mature for several years under carefully controlled conditions of humidity and temperature in the dark. Then only are they finally selected, rough machined and painstakingly hand-fitted to the guns in the Artisan Collection before receiving their deep hand-rubbed finish.

Artisan Collection WITH ROUND ACTION

RGEX Artisan Serie 3 - Ejector

New 28 ga. sized round body action, scalloped for tighter wood-to-metal fit

All barrels 550 mm (22 in.) in length

Available Calibers: 9,3 x 74R - 8 x 57JRS

Comes in a New Prestige Chapuis Armes gun case.

Progress Express rifles and Super Orion Express rifles

There is no alternative to individual workmanship when quality is the goal. Highly experienced Master Gunsmiths accomplish many operations by hand, fashioning actions, contouring receivers and detonating, polishing the rough metal and bare walnut, cutting exquisite checkering. Then they hand over the essential parts to engravers who will in turn

make them unique. Deep-cut floral or foliage motifs underline exquisite bouquets and refined "al bulino" game scenes, carrying on the external spirit of the hunt and the hunter. The rarest walnut blanks, matured to perfection, hand finished in linseed oils, are checkered by hand. This is flawless gunmaking at its best.

Grand Luxe collection

MORE ABOUT ENGRAVING

chapuis-armes.com

All the steps of a handmade engraving

Drawing is the first step

Using layer to match drawing outline with receiver

Several technics can be used to make the engraving alive

The various engraving Techniques

At Chapuis Armes, we well know that fashions fade out, while elegance and good taste are eternal. Our engravers work relentlessly and methodically to perpetuate this art which our ancestors have passed on to us with passion.

We thus make of each arm of our "Artisanale" or "Grand luxe" range, a unique production. It shows by the quality of the metalwork, wood to metal fit, precision of the details found on these beautiful engravings showing hunting scenes, forever on the steel of your receiver.
